

TAKING AIM 101-1 (Cross)

(1-5 Doses = \$75)(6-9 Doses = \$60)(10 Plus Doses = \$50) Per Collection Day (Winter Pricing)

Sire: Second Chance = Big shot x American Way

Dam: Alias

Stress Negative | BF: .59 | LEA: 10.4

Raised By Forsyth Bros.

Taking Aim 101-1 was the pick of the barn for us at Duncan 2011 and for that matter all of the cross boars that showed this entire year. Taking Aim in my opinion is as near perfect as you can find. His foot, bone, structure, frame size, muscle and soundness are in complete balance, however, he has the X factor to make his offspring great. We are excited about you TAKING AIM with us in 2012 with 101-1.

TEN HIGH (Cross)

Winter Pricing \$25

Sire: War Wagon

Dam: Crossbow x Jailbait X Payroll

Stress Positive

Raised By Don Payne Family

The Dam of Ten High is a littermate to the Grand Champion Barrow at the OYE in 2008. The grand dam produced a premium sale barrow at Tulse and OYE in every parity. Grand Dam also produced the 2006 Reserve breed cross barrow at OYE and the Res Champion Cross Gilt at OYE in 2007.

Ten High was one of three cross boars I marked in the cross show at Duncan 2011. Being stress positive and outthere with muscle, this guy can flat move. He is square, tall fronted, big muscled, a great look and off center. Use this guy on your more plain females and watch out.

UNBELIEVABLE (YORK)

Winter Pricing \$25

Sire: Committed 44-1

Dam: Headliner

Stress Negative | BF: .97 | LEA: 9.4

Raised By Rodibaughs

Unbelievable was purchased at Duncan 2011. He was our pick of all the york boars there. The first time I saw Unbelievable he weighed around 200 pounds. He looked like the type to a champion barrow at a major show. His foot, bone, center rib, back and lower butt are really good. He is tall fronted with a long level hip and excellent muscle. He has one of the biggest roots to his tail I have ever seen. An excellent boar to make pures or those blues that we all like.

OPTIMUS STEEL (HAMP)

Winter Pricing \$25

Sire: Optimus Prime =Stainless Steel X Kong 6-2

Dam: Stainless Steel

Stress Negative | BF: .70 | LEA: 9.6

Raised By Cedar Ridge

Optimus Steel was our pick of all the Hamp boars Duncan 2011 as he showed in the cross show because of his markings. Optimus Steels strong points include feet, legs, angles and structure. He is square coming and going with balance, width and muscle. This guy has a chance to make Hampshires better!

THIRD COMING (SPOT)

Winter Pricing \$25

Sire: Leap Frog

Dam: S and L

Stress Carrier | BF: .85 | LEA; 9.2

Raised By Ethan Frantz

Third Coming was our pick of the spot boars Duncan 2011. He has big square toes, heavy boned with an athletic hind leg. His chest width is wide and square, his center rib is excellent and he has a huge top and butt. His soundness and SQUARENESS both coming and going are big plusses. He combines that with an excellent color pattern as well.

TEXAS RANGER (DUROC)

Winter Pricing \$25

Sire: Final Round = Final Approach x Walker Red 14-1

Dam: Walker Red 14-1

Stress Negative

Raised By Kerby Knaupp

Texas Ranger was purchased at Duncan 2011. Everyone has been looking for the outcross red boar in the industry. Where here he is!!!!!!! The Dam of Final Round and the Dam of Texas Ranger are littermates so hang on this could get really good. Kerby tells me that he has bred all the sows behind this boar for 20 plus years and they are sound, cycle, have pigs and milk. Beyond the lined up, old genetic sow power that goes back to JR Walker, Texas Ranger has big feet, square toes, heavy boned, big blade, center rib, big back and butt. His frame score is perfect, sheath is clean and teats are good. This guy is a breeding boar in a barrow type package.
